

Waste sorting guide:

93 percent of waste is recycled!
Thank you for sorting!

Garbage

All plastics, diapers, bandages, toiletry. Useless textiles, shoes, rubber, leather. Dirty and non recyclable paper, cardboard. Leftovers if you don't compost or live in a condominium where organic waste is recycled.

NO dangerous waste, electronic devices, glass or metal.

Utilisation:

For electricity and district heating in waste-to-energy plant.

Organic waste

Leftovers, outdated food products, fruit and vegetable peelings, coffee and tea grounds (filter paper included), small amounts of paper towels.

NO liquids, plastics, cardboard, grease or oil.

Utilisation:

For energy and soil in organic waste treatment facility.

Cardboard

Cartons (e.g. milk, juice and food product cartons), paper bags.

NO paper, dirty or wet cardboard, plastics

Utilisation:

For core board, recycled cardboard

Metal

Cans, small metal items (e.g. pots and pans), foil.

NO electronic devices

Utilisation:

Raw material for metal products

Dangerous waste

Paints, varnishes, glues, waste oils, batteries, energy saving lights, strong detergents, solvents and other chemicals, medicines.

NO explosives! Deliver explosives to police.

Please note! Play it safe: handle as dangerous waste if you suspect that your waste might be dangerous!

Lassila & Tikanoja Oyj collects quantities over 200 liter for free. Order collection from 010 636 6031.

Deliver outdated medicines to pharmacy.

Glass packaging waste

Glass bottles and glass jars. Rinse dirty glass packaging with cold water if necessary. Please return deposit glass bottles to reverse vending machines in shops!

NO porcelain or ceramics, windows or mirrors, light bulbs or lamps, glass dishes

Utilisation:

Crushing for gravel substitute, recycling

Paper

All paper delivered by postal service: ads, magazines, envelopes, office paper, phonebooks, books (without covers).

NO cardboard, soft tissues, brown paper or paper bags, gift wrapping papers, wet or dirty paper.

Utilisation:

Recycled paper

Where to take the waste?

www.vestia.fi

Houses, small condominiums (less than 10 apartments)

Only waste container for houses is a garbage bin. In addition it is recommended to get a compost for organic waste. If you don't have a compost, organic waste can be sorted to garbage.

Even smaller condominiums can acquire waste containers for recyclable wastes, but it is not required by waste management orders.

Own waste point:

Garbage
(and organic waste if you don't compost)

Organic waste
(compost)

Eco take-back point :

Paper Metal Glass packaging waste Cardboard
(and plastic packaging waste if it is collected near by)

Apartment buildings, rowhouses (more than 10 apartments)

Larger condominiums have waste containers for garbage and recyclable wastes. Required waste containers are: garbage, organic waste, metal, glass packaging waste, paper and cardboard.

Condominium waste point:

Garbage

Organic waste

Paper

Metal

Glass packaging waste

Cardboard

Larger waste batches, home appliances and dangerous waste

Larger waste batches are received at waste stations. Locations and opening hours for the waste stations are found at our web page: www.vestia.fi.

Bring **home appliances and electronic devices, wood, scrap metal, branches, non recyclable waste and dangerous** waste to waste stations!
